916.521.4784

Job Objective:

To use my JavaScript and web application skills to make awesome websites and apps.

Technical Skills:

Programming Language:

Javascript
PHP
Python
Java

Data stores:

MySQL
MongoDB

Tools:

Linux Commands (ssh, less, grep, vim, etc)
git/SVN
Apache 2
Grunt
Experience as a QA Test Engineer

Environments/Frameworks:

Node.js (Javascript)
Express.js (Javascript)
Angular.js (Javascript)
CodeIgniter (PHP)
jQuery (Javascript)

Markup Languages:

HTML 5
CSS 3

Relevant Work Experience:

CNE Media (Kink.com)

URL: <http://cnemedia.com/>

Senior Software Developer (January 2014 - Current)

Job tasks and duties:

Redesigned existing consumer facing web tier using Node.js
Designed and developed RESTful APIs for internal services (Product, Content, Auth, etc)
Managed team of developers to develop new enhancements, improve test coverage, audit code, and deliver features within budget and on schedule

Accomplishments:

Spearheaded the switch to Node.js and oversaw the complete migration from Java

Software Developer (June 2011 - December 2013)

Job tasks and duties:

Maintained and updated internal Shoot Booking and Publishing application
Maintained and updated Affiliate Ad application and related tools
Designed, built, and maintain internal video encoding systems

Accomplishments:

Untangled a massive SVN repository, creating smaller repositories and projects for better code deployment (ie un-spaghettified the code)

Built new encoding platform to improve video production workflow

Location Labs

Front End Developer (November 2010 - June 2011)

URL: <http://www.locationlabs.com>

Job tasks and duties:

Helped develop and implement front-end design and UI for personal online safety service Safely (safely.com)

Used and created custom JavaScript widgets using the Dojo JavaScript toolkit

Enhanced user interface by implementing AJAX support for front end

Helped ensure cross browser support, including IE7/8/9, Firefox3/4, Chrome, and Safari

Utilized CSS3 features and ensured graceful degradation for browsers which do not support CSS3

Accomplishments:

Released version 1.0 through private beta

Lang Antiques

Web Developer (August 2007 - November 2010)

URL: <http://www.langantiques.com>

Job tasks and duties:

Developed and designed custom content management system using PHP5, MySQL, and CodeIgniter
Improved company workflow by allowing staff to upload images and modify product descriptions with a single entry point

Used AJAX, jQuery, and CSS to enhance the user interface to both the public facing website and the internal, custom-built CMS

Raised the website's rankings from the low 200s to the top 5 spots in Google, Yahoo, and Microsoft Bing for specific key phrases

Redesigned website to include cross browser compatibility using CSS

Accomplishments:

Converted all data in an older inventory management system which ran MS Access into a new custom built solution running MySQL5 and PHP5

Improved the product publishing process by integrating the inventory management system with the public facing website

Education:

San Francisco State University

Degree: Bachelor of Arts in Philosophy and Religious Studies
